

# We empower organizations with Agentic AI

**AI by DNA is an Artificial Intelligence transformation agency that supports ambitious organizations to scale their AI and Data capabilities, augmenting efficiency, performance and growth.**

We are your trusted partner to guide your AI transformation. We are neutral and will compose the best solution to your needs. If it does not exist, we will build it for you.

Conversational Agent  
Pharmaceutical Care

**“AI by DNA has revolutionized our pictograms' way of communicating information to patients, by transforming it to a natural language conversation experience for them!!!”**

Sophia Demagou (Piktocare | GET2WORK)

## Conversational Agents

**Conversations are the new markets.** AI-driven Conversational agents provide personalized, real-time and in-depth interaction.

Unveil new AI by Chat opportunities: With AI by Chat you can proactively promote, reactively support and anytime recommend your product & services . **Gain and retain customers.**

Unlock the power of AI by Phone: Human-like AI Voice Assistants are radically changing the way businesses use their phone lines. **Improve productivity, efficiency and customer satisfaction.**

Scale your potential with AI by Clone: Such a video-based agent, showcasing a human-like avatar, converse with people inside a specific knowledge context, via audio and in multiple languages. **Transform your customers' experience.**

## Knowledge Assistants

In the fast-paced environment of today, quick access to accurate information and reliable action taking are key to enhance efficiency.

**Unique Internal Data Retrieval Focus:** AI by DNA assistants focus on internal information retrieval, tapping seamlessly into complex sources, to generate your own knowledge based search engines.

This means **streamlined information and work flows**, i.e. more accurate, efficient and secure. **Improve efficiency** on regulatory & compliance, inventory management, operating procedures etc.

## Decision Engines

**Data Processing & Predictive Analytics for Insightful Solutions:** In an era where data drives innovation, AI by DNA data analysis capabilities empower you to derive actionable insights from complex data sets. **Enhance decision-making**, operational and commercial efficiency.

**Real-time data driven decision making:** AI by DNA tools set delivers evidence-based insights that help **resource allocation** optimization, comprehensive **revenue management**, real-time **dynamic pricing**.

**"Looking to harness the power of advanced language models with a foundation in data-driven insights? Need a custom agent with predictive analytics, retrieval capabilities, and seamless integration with vector stores and other tools? We are here to design, develop, and deploy tailor-made solutions that meet your specific business objectives. Let's turn your data and context into actionable intelligence."**

**George Kotzamanis, Co-Founder | Chief Operating Officer**
